

Sprint Retrospective Meeting	
	2018/12/19
Aspects performing well	
<ul style="list-style-type: none"> ● Every team member is very motivated and can actively participate in the project. ● Every team member is very clear about the requirements and objectives of our project. ● Every team member is mastered the main principle of Machine Learning and Android Development. ● Every team member consciously learned about the algorithm (CNN) involved in this project. ● Every team member can attend every meeting on time, and fully express their views at the meeting to solve the problems encountered in the learning process. ● Every team member is well prepared for the Mid project review. ● Each member of the group has a more detailed and reasonable division of labor. ● The whole project has been accelerated and is expected to be completed within the specified time. 	
Aspects requiring improvement	
<ul style="list-style-type: none"> ● The Android application interface we developed looks out of style. ● The picture material we found is not enough. ● Our team should start programing core code as soon as possible.
