Sprint Retrospective Meeting
2018/11/15

Aspects performing well

- Every team member is very motivated and can actively participate in the project.
- Every team member is very clear about the requirements and objectives of our project.
- Every team member consciously learned about machine learning and Android development.
- Every team member can attend every meeting on time, and fully express their views at the meeting to solve the problems encountered in the learning process.
- Every team member is well prepared for the proposal project.

Aspects requiring improvement

- The assignment of tasks within the group is not reasonable.
- The unreasonable process arrangement of the whole project may lead to the failure to complete on time.
